GAME DEVELOPER | UNITY DEVELOPER | GAMEPLAY PROGRAMMER

Creative and technically skilled game developer with a strong foundation in computer science and a passion for creating immersive gameplay experiences. Experienced with Unity, C#, and game design principles, adept at collaborating in teams, rapid prototyping, and implementing gameplay systems. Proficient in UI/UX features and scalable gameplay mechanics. A quick and self-motivated learner, continuously exploring new tools and techniques to enhance player engagement and development efficiency.

SKILLS AND PROFICIENCIES

- C#, C++, Python, Javascript
- Unity(2D/3D), Unreal Engine(basic), Git, Blender, Gimp.
- Procedural Generation, Physics, UI/UX, AI

LANGUAGES

- English(Native)
- German(Intermediate -GN422, 4th semester level)

EDUCATIONAL BACKGROUND

Bachelor Of Computer Applications

St. Joseph's University | (Expected) 2026

Relevant Courses: C# And DOTNET Framework, Computer Communications And Networks, Database Management Systems, Computer Multimedia And Animationg, German

ACHIEVEMENTS

- Competed In The Final Stage of the St. Joseph's University Open Day Tech Competition.
- Developed An ASL Translator in one week for the 2nd Open Day Tech Competition
- Developed and published a small 2.5D platformer on itch.io

CERTIFICATIONS

- Unity Multiplayer Intermediate C# & Networking - Udemy
- Complete C# Unity Game Developer 3D - Udemy
- Complete Blender Creator: Learn 3D Modelling for Beginners - Udemy

PROJECTS

Voxel Terrain Generation System

Unity, C#, Procedural Generation

- Developed a voxel based procedural generation system using Multi-Octave Perlin Noise in Unity, and a chunk based generation system for modular and optimum performance and memory usage, Added user-configurable parameters to change terrain generation

Virtual Reality Multisensory Demo

Unity, C#, Oculus SDK, XR Toolkit

- Created a VR prototype shooting range comparing visual, audio and haptic feedback in Unity with integration of XR Toolkit for interaction and feedback mechanisms, as well as an in-depth score system to score each player.

2.5D Platformer Boost!

Unity, C#

- Made a 2.5D Platformer where the user plays as a rocket to reach the next checkpoint and progress through harder levels, published on itch.io as a speed game challenge built in 24 hours.

Discord Music Bot

Javascript, Node.js, Discord API, Cloud Server Hosting

- Built a bot that streams music in voice channels using Youtube Integration which handled command parsing, a queue system, and async event management with proper API usage and networking techniques, managed cloud server hosting and multiple simultaneous user input.

ASL Translator

Python, AI, OpenCV, TensorFlow

- Developed a hand-sign recognition system translating American Sign Language into text in video call software using CNN's in python, it recognizes and can be manually and quickly trained on new hand signs, connects to the users webcam to display subtitles depending on the sign, can be used in video call software like google meet, zoom, etc.
